Séminaire virtuel 2021

4 février 2021

OVARIAN CANCER

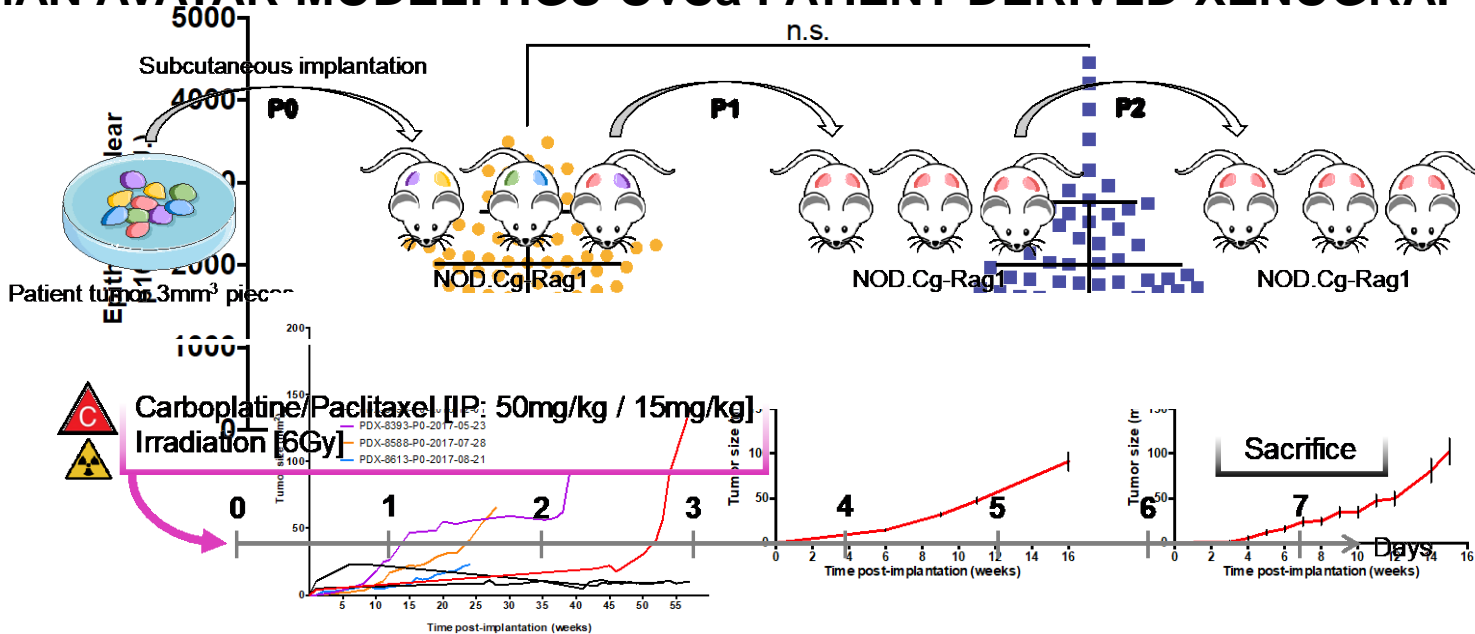

- Most lethal gynecological malignancy
- Different subtypes differ in origin, response to treatment and aggressiveness
- High Grade Serous Ovarian Cancer (HGS-OvCa): most common form of malignant ovarian cancer

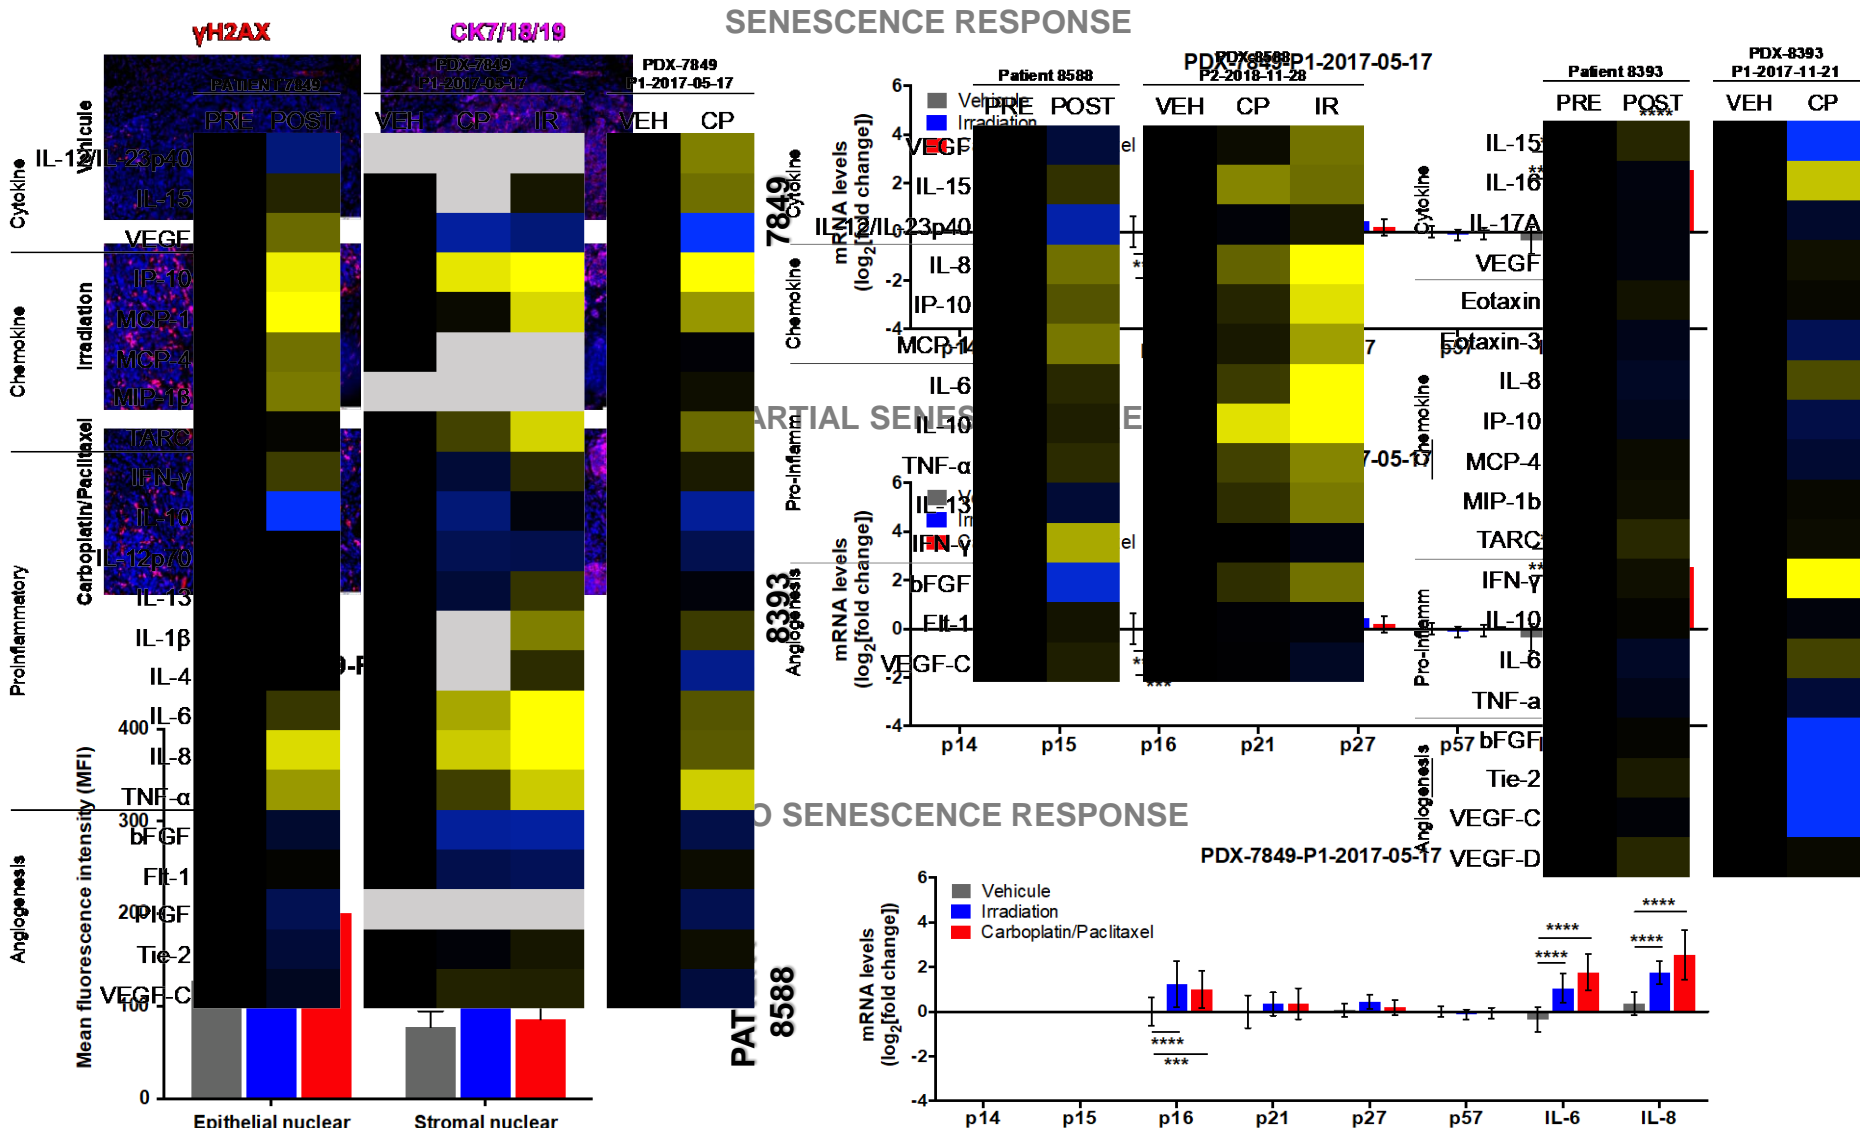

OVARIAN CANCER

HUMAN AVATAR MODEL: HGS-OvCa PATIENT-DERIVED XENOGRRAFT

RESPONSE IN HGSOc-PDX 7 DAYS AFTER TREATMENT
